My Portfolio : https://saifu-01.github.io/Saifu-01-Portfolio/

CAREER SNAPSHOT

- A Business Analyst professional with progressive experience at Fidelity Information Services (FIS) supporting **SQL-based data analysis,** ETL/ELT**,** EDM, TRM and business intelligence solutions across high volume financial & operational datasets.
- Strong Expertise with SSRS, Procedural Programming (T-SQL), **PostgreSQL** and **Google BigQuery** including query-based validation, data cleansing, source-to-target mapping and anomaly detection.
- Specialized in investigating data & process issues**,** performing root-cause analysis, improving reporting performance with **AI-enabled analytics**, Generative AI, prompt engineering, Entity relationship diagram to resolve issues and streamline data-driven processes.
- Proficient in **MSSQL Commands for Data Synchronization** by Supporting OLTP/OLAP Methodologies, reporting modernization and failure diagnostics analysis through Multi-Criteria Decision Analytics Models.

ACADEMIC FOUNDATION

- **St. Gonsalo Garcia College of Arts and Commerce – 2023** **Maharashtra - India**
  Bachelor in Business Management and Studies C.G.P.A - 8.82
- **Florida Atlantic University – 2026** **Florida - U.S.A.**
  Master in Business Analytics G.P.A - 3.7

PROFESSIONAL FOOTPRINT

➢ **Business Analyst - FIS** **July 2023 – December 2024 -- India**

- Performed hands-on **SQL data wrangling**, stored procedures, joins, subqueries, CTE and aggregations across financial datasets considering Data Governance within the process.
- Maintained detailed financial models and analytical schedules supporting liquidity planning, debt requirements, capital allocation and DOMO Finance initiatives by utilizing **Power BI, Tableau, Cognos,** Quicksight and Qlik Dashboards to communicate KPIs, trends, anomalies .
- Applied SQL commands, Alteryx, advanced Excel, **PowerShell and modern Power Query** to analyze insurance data, develop analytical workflows, support reporting and business insights.
- Worked in **production environments** across AWS (Redshift, Athena, EC2 & S3), FIS GetPaid, Treasure GPT, Azure, ALM, FedNow and RTP which resulted in reducing manual Reporting by 30%.

➢ **Operations Analyst - FIS** **September 2021- June 2023 -- India**

- Designed and optimized **data-processing workflows** across relational databases and data pipelines, improving data reliability and downstream reporting performance.
- Created detailed Financial Pseudocode, Processing logic, Field-level transformations and Parsing rules**,** monitoring **Quote-to-Bind ratios,** documenting **RFQ, RFI** under **GCMS** to identify exceptions, process gaps, clarify requirements and deliver reliable data solutions.
- Developed management recommendations by identifying process constraints and margin pressures**,** quantifying their impact and outlining corrective actions through **spot-drop and ad-hoc analysis** under GRP and ACD/WOA metrics by data Mapping and I/O analysis to improve accuracy.

➢ **Operations Executive – FIS** **June 2019- August 2021 --India**

- Designed **scenario and sensitivity analyses** to evaluate investment opportunities, business initiatives and key financial assumptions, quantifying potential impacts on profitability and returns.
- Executed transaction-level analysis to identify data discrepancies, exceptions, processing issues, documenting prerequisites, **data bottlenecks** to incorporate stakeholder judgment, market intelligence and factual business patterns into strategic decisions.
- Investigated operational data issues and identified data congestion, **processing gaps, exceptions** and reporting requirements, translating findings into remedial measures.

CORE COMPETENCIES

Data Profiling & Integration | Performance Metrics & Forecasting | SQL Views and U/V tables
Dimensional & semantic Modeling | Analytics Automation | DAX & Dashboard Development

FUNCTIONAL EXPERTISE

BRD, FRD, FSD, SRD, & RTM | Scalable Data Workflow | What-if & Goal Seek Analysis
Requirements Gathering | BPMN & Problem Decomposition | Data Transformation & Data Ingestion

CERTIFICATIONS & DEVELOPMENT

- Data Analyst — Simplilearn
- McKinsey Forward Program — McKinsey & Company
- Dataflows Gen2 , End-to-End Analytics & Data Warehouses — Microsoft Fabric
- Foundations: Data and Data Everywhere — Google

TECHNOLOGY & INNOVATION ENGAGEMENT

- **Google Developers Group :** Productivity, Automate Finance workflows and Improve Tech-driven solutions.
- **Microsoft Fabric Community :** Data Ingestion, API Integration and Financial Data & Analytics workflow.
