My Portfolio : https://saifu-01.github.io/Saifu-01-Portfolio/

CAREER SNAPSHOT

- A Business Analyst with 5+ Years of progressive experience focusing on data analysis, validation, visualization, statistical analysis, driving business analysis, operational improvement, product analytics, **requirements delivery, financial reporting, analytical solutions, data models, business intelligence capabilities and digital transformation initiatives across financial services environments.**
- Proficient in data transformation and orchestration workflows using **SQL, Python, dbt (Data Build Tool) and Airflow**, supporting dependable reporting structures and downstream financial analysis.
- Practical exposure in **SAFe/Agile, Scrum and SDLC activities**, contributing to backlog discussions, sprint-related reviews, testing coordination, deployment, solution evaluation and release validation.
- Skilled in **AI-enabled automation, data testing, documentation and cloud-based analytics across AWS and GCP** to improve reporting reliability, streamline recurring activities and support scalable financial operations.
- Strong expertise in **A/B testing, test-versus-control comparisons, cohort analysis** and increment measurement to evaluate new program/project effectiveness, quantify business impact and identify opportunities to improve product performance.

ACADEMIC FOUNDATION

- **St. Gonsalo Garcia College of Arts and Commerce** **Maharashtra - India**
  Bachelor in Business Management and Studies C.G.P.A - 8.82
- **Florida Atlantic University** **Florida - U.S.A.**
  Master in Business Analytics G.P.A.- 3.7

PROFESSIONAL FOOTPRINT

➢ **Data Reporting Analyst – FAU (Internship)** **January 2026 – May 2026**

Applied Coursework – Database Management Systems

- Demonstrated **ownership and independent decision-making** while managing competing priorities, resolving business requirements and coordinating cross-functional deliverables.
- Developed analytical dashboards through **Tableau, Power BI, Gurobi, Cognos, Qlik, Quicksight, Plotly dash, Looker, Omni, Streamlit, Sigma and Hex** by Supporting OLTP/OLAP Methodologies, ERP documentation, reporting modernization and failure diagnostic analysis through Multi-Criteria Decision Analytics Models.
- Conducted data validation and reconciliation procedures to identify **missing records, inconsistencies, calculation differences** and reporting exceptions.

➢ **Professional McKinsey Forward Program- McKinsey & Company** **Sep 2025- Dec 2025**

- Applied structured problem-solving approaches to break down ambiguous **business challenges into defined analytical questions** and actionable workstreams.
- Developed approaches for prioritizing **competing deliverables, coordinating project** activities and progressing work through defined milestones.
- Specialized in investigating process issues and root-cause Interpretation with **AI-enabled analytics** including ChatGPT, Gemini, Copilot, Claude, API, Grok, Windsurf, Perplexity, Gamma, Kimi 2.6, Opus 5.5, Fable 5.1, ML, NLP, LLM, RAG, Prompt Engineering, Generative AI and ERD to streamline data-driven processes.

➢ **Business Analyst - FIS** **Oct 2020 – Dec 2024**

- Performed hands-on SQL and Python data wrangling, **number-based forecasting**, supporting liquidity planning, debt requirements, capital allocation and DOMO Finance initiatives to demonstrate KPI metrics, evaluate changing business assumptions and potential expense impacts
- Operated across production environments including **AWS, Stitch, GCP, FIS GetPaid & Matillion by utilizing** Treasure GPT, **Agentic Insights Suite** , OpEx & CapEx, Alteryx, ALM, FedNow and RTP that streamlined recurring enterprise data which resulted in reducing manual reporting by 30%.
- Designed and supported **dbt-based data models and Airflow orchestration workflows** to coordinate repeatable data transformations, scheduled processing and reporting dependencies.
- Built analytical workflows and data models to organize **source information, establish metric definitions** and support repeatable reporting requirements.

CORE COMPETENCIES

Analytics Engineering & Data Architecture | Data Orchestration & Workflow Automation
Financial Reporting & Accounting Analytics | Self-Service Business Intelligence
AI-Powered Process Automation | Dimensional & Relational Modeling

FUNCTIONAL EXPERTISE

BRD, FRD, FSD, SRD, & RTM | Jira, Agile & Product Backlog Tracking | What-if & Goal Seek Analysis
As-Is / To-Be Assessment | Data reliability & Testing | Forecasting, Scenario Analysis

CERTIFICATIONS & DEVELOPMENT

- Data Analyst — Simplilearn
- Dataflows Gen2 , End-to-End Analytics & Data Warehouses — Microsoft Fabric
- Foundations: Data and Data Everywhere — Google

TECHNOLOGY & INNOVATION ENGAGEMENT

- **Google Developers Group :** Productivity, Automate IT workflows and Improve Tech-driven solutions.
- **Microsoft Fabric Community :** Data Ingestion, Product & API Integration, Finance Data & Analytics workflow.
