CAREER SNAPSHOT

- A Senior Business Intelligence Analyst with progressive experience at Fidelity Information Services (FIS) supporting **SQL-based data analysis, ETL/ELT, EDM, TRM, Reporting, Data validation, Data Lineage troubleshooting issues** and business intelligence solutions across high-volume transactional datasets.
- Strong Expertise with **SSRS, Procedural Programming (T-SQL), PostgreSQL, Power BI, Tableau and Cognos** including query-based validation, data cleansing, source-to-target mapping and anomaly detection
- Experienced in **investigating data and process issues**, performing root-cause analysis, improving reporting performance, automating recurring processes and partnering with IT, engineering, application, business and executive stakeholders to resolve issues and streamline data-driven processes.
- Specialized in **MSSQL Commands (DDL, DML, DQL, DCL and TCL) for Data Synchronization** by Supporting OLTP/OLAP Methodologies and Reporting modernization and Failure diagnostics analysis through Multi-Criteria Decision Analytics Models like **Regression, Statistical Analysis, EDA, Classification, Clustering, Predictive modeling**, Finance Resources Allocation & Grounding, Hallucination and Mitigation.

ACADEMIC FOUNDATION

- | | |
|--|----------------------------|
| • St. Gonsalo Garcia College of Arts and Commerce – 2023 | Maharashtra - India |
| Bachelor in Business Management and Studies | C.G.P.A - 8.82 |
| • Florida Atlantic University – 2026 | Florida - U.S.A. |
| Master in Business Analytics (Specialized in DBMS & Predictive Modeling) | G.P.A - 3.7 |

PROFESSIONAL FOOTPRINT

- **Senior Business Intelligence Analyst - FIS** **Nov 2023 – Dec 2024 -- India**
- Performed hands-on **SQL data wrangling**, created Dashboards in Power BI, Qlik, QuickSight, Plotly Dash, Cognos & Tableau across Financial datasets by considering Data Governance.
 - Maintained detailed financial models and analytical schedules supporting **liquidity planning, debt requirements, capital allocation and DOMO Finance** initiatives by utilizing Power Bi and Tableau Dashboards to demonstrate KPI Metrics.
 - Developed and optimized **complex SQL queries, stored procedures, joins, subqueries, CTE and aggregations** to support data analysis, reporting and application requirements.
 - Worked in production environments across **AWS (Redshift, Athena, EC2 & S3), FIS GetPaid, Treasure GPT, Azure, ALM, FedNow, and RTP**, that streamlined recurring/reusable enterprise data and reporting workflows which resulted in **reducing manual Reporting by 30%**.

➤ Senior Operations Analyst - FIS

Sep 2021- Oct 2023 -- India

- Designed and optimized **data-processing workflows** across relational databases and ETL pipelines, improving data reliability, synchronization, and downstream reporting performance.
- Created detailed Financial Pseudocode, Processing logic, Field-level transformations and Parsing rules, monitoring **Quote-to-Bind ratios**, documenting **RFQ, RFI** under **GCMS** to identify exceptions and process gaps and illustrating to application developers, data engineers, business analysts, IT teams and business users to troubleshoot database issues, clarify requirements and deliver reliable data solutions.
- Developed management recommendations by identifying process constraints and margin pressures, quantifying their impact and outlining corrective actions through **spot-drop and ad-hoc analysis** under GRP and ACD/WOA metrics by Data Reconciliation, Mapping and I/O analysis to improve accuracy.

➤ Operations Executive – FIS

June 2019- Aug 2021 --India

- Designed **scenario and sensitivity analyses** to evaluate investment opportunities, business initiatives and key financial assumptions, quantifying potential impacts on profitability and returns while preparing **board-level reporting and decision-support materials** for executive leadership.
- Executed transaction-level analysis to identify **data discrepancies, exceptions, processing issues**, documenting prerequisites, data bottlenecks and reporting requirements to incorporate stakeholder judgment, market intelligence and factual business patterns into strategic forecasts and planning decisions.
- Investigated operational data issues and identified **data congestion, processing gaps, exceptions and reporting requirements**, translating findings into corrective actions.

CORE COMPETENCIES

ETL/ ELT Workflows	Scenario & Sensitivity Analysis	Conceptual, Logical, ER & OOM reporting
Dimensional Modeling	DCF & SYFT Analytics	SQL Views and U/V tables
Requirements Gathering	SWOT, DMAIC, IOP, DRI	DAX & Dashboard Development

FUNCTIONAL EXPERTISE

BRD, FRD, FSD, SRD, & RTM	Data Profiling & Integration	What-if & Goal Seek Analysis
Ad-hoc & Decision Tree Configuration	Data Workflow Optimization	BPMN & Problem Decomposition

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

• Data Analyst	Simplilearn
• McKinsey Forward Program	McKinsey & Company
• Dataflows Gen2 , End-to-End Analytics & Data Warehouses	Microsoft Fabric
• Foundations: Data and Data Everywhere	Google

TECHNOLOGY & INNOVATION ENGAGEMENT

- Google Developers Group** : Productivity, Automate workflows and Improve Tech-driven solutions
- Microsoft Fabric Community** : Data Ingestion, API Integration and Financial Data & Analytics workflow.
