PROFILE SUMMARY

- A Business Analyst with progressive experience at **Fidelity Information Services (FIS)**, specializing in **SQL-Querying and Analysis, ETL-style data workflows, Data validation, Data quality, Reporting, KPI analysis and Business requirements**.
- Experienced in translating business needs into technical specifications, **transforming OLAP & OLTP** into structured analytical datasets and Investigating data discrepancies.
- Proven track record of delivering insights through **Data mining, Data lineage, Metadata management, analytical Data Structures, Statistical modeling and Visualization** techniques to influence strategic decisions.
- Proficient in **SQL, Power BI, Altair AI Studio, Advanced Excel, DAX and Tableau** with experience in building automated workflows and maintaining cloud data analytics environments.

EDUCATION

- | | |
|--|---|
| • St. Gonsalo Garcia College of Arts and Commerce
Bachelor of Management and Studies | Maharashtra - India
C.G.P.A - 8.82 |
| • Florida Atlantic University
Masters in Business Analytics | Florida - U.S.A.
C.G.P.A - 8.82 |

PROFESSIONAL EXPERIENCE

Designation : Senior Business Intelligence Analyst

November 2023 – December 2024

 **Key Responsibility Areas:**

Fidelity Information Services

- Partnered with **P&C Insurance business stakeholders, data teams and IT** to gather and translate business goals into data requirements, functional specifications and analytical solutions supporting **policy, claims, underwriting and billing** processes.
- Performed hands-on **SQL-based data profiling, data analysis, data discovery and Synchronization** across **Insurance datasets** to identify data-quality issues, patterns, relationships and business-rule exceptions.
- Developed **Source-to-target mappings, transformation logic, Business rules and Data-processing Specification** for ETL/ELT and downstream insurance reporting solutions.
- Analyzed **Policy, Claims, Billing and Underwriting data flows**, documenting Data lineage, Data sources, transformation constraints and reporting dependencies.
- Collaborated with Data Engineers, Architects, Developers, and business teams on **data integration, ETL/ELT, data pipelines, and data warehouse** Initiatives.
- Supported **UAT, Data Authorization, Defect triage, Root-cause analysis and Issue conclusion**, ensuring data outputs aligned with business requirements.

- Developed automation solutions that streamlined recurring data and reporting workflows which resulted in **reducing manual reporting by 30%**.
- Created **Pseudo code and Detailed Transformation logic** to translate Operating Procedures into technical processing requirements, defining data conditions, field-level transformations, Parsing rules and source-to-target processing logic for downstream data engineering and reporting solutions.

Designation : Senior Operations Analyst

September 2021- October 2023

Key Responsibility Areas:

Fidelity Information Services

- Gathered business Use-cases and translated stakeholder needs into **Reporting specifications, Business rules, Data Guideline and Acceptance criteria**.
- Performed **Data Quality Check, Reconciliation, Data mapping and Input & Output analysis** to improve accuracy and consistency across operational and reporting datasets.
- Partnered with cross-functional teams to identify **bottlenecks, evaluate technical solutions and implement improvements** balancing immediate reporting needs with longer-term operational efficiency.
- Analyzed operational data and performance trends using Excel and SQL, identified process gaps and data-quality issues, and delivered KPI reporting and actionable insights to support process improvement and business decision-making.

Designation : Operations Executive

June 2019- August 2021

Key Responsibility Areas:

Fidelity Information Services

- Managed operational data and reporting processes supporting **Data accuracy, Business-regulation adherence, KPI monitoring and issue resolution**.
- Analyzed transactional and operational information to identify exceptions, validate data and support business reporting requirements.
- Collaborated with Finance and technology stakeholders to document **Process Prerequisite, Data Congestion and narrating Reporting needs**.
- Managed day-to-day operational activities, maintaining accurate transaction records, coordinating workflow execution, and resolving routine operational issues to support timely and efficient business processes.

CORE COMPETENCIES

FSC, EZLYNX & Dwelling (DP-3)	Duck Creek, Majesco & Vertafore AMS360	Agile & Scrum Methodologies
CGL, BOP, PAP, HO-3&5	Actuarial Analysis	Adverse Selection
Indemnity & Subrogation	Proximate Cause	Risk Assessment

TECHNOLOGY & INNOVATION ENGAGEMENT

- **Google Developer Groups (GDG):** Engaging with the developer community to learn how **AI can enhance Productivity, Automate workflows and Improve Technology-driven solutions**.
- **Microsoft Fabric Community:** Exploring **Data ingestion, API integration and Modern data & Analytics workflows** using the Microsoft Fabric ecosystem.
